

NutriPath Website — Master Implementation Prompt

This document is a complete briefing for an AI agent (or human team) tasked with planning, designing, building, and populating content for the NutriPath Canada marketing website. It is self-contained. No additional clarification is needed to begin.

PART 1 — PROJECT OVERVIEW & STRATEGIC INTENT

What You Are Building

A high-conversion marketing website for **NutriPath Canada** — an accessibility-first, RD-created exam preparation platform for Canadian dietitian candidates preparing for the **CDRE** (Canadian Dietetic Registration Examination) and **KCAT** (Knowledge, Competency Assessment Tool) licensing exams.

The website's single job: **convert anxious, qualified dietitian candidates into paid CDRE Platform members or email waitlist subscribers**, while positioning NutriPath as the most credible, human, and accessible CDRE/KCAT prep product in Canada.

Primary Domain

nutripath.ca

Immediate Conversion Goals (Nov 2026 Pilot Launch)

- 25 founding member sign-ups for the November 2026 CDRE cohort
- 200+ email waitlist subscribers
- 5+ newcomer agency or university partnership inquiries
- KCAT-specific landing page live by June/July 2026 (urgent priority — treat this as Page 1 to be delivered)
- Rank page 1 for: "CDRE exam prep Canada", "KCAT study guide Canada"

The Emotional Promise

Every visitor should feel: *"Someone who has actually been here built this — just for me. I am calm. I am capable. I know what to do next."*

This is **not** a platform that shouts at you to buy. It never pushes. It never promises a pass. It walks beside you.

PART 2 — ACELY DESIGN SYSTEM REVERSE-ENGINEERED

Before building NutriPath, understand what makes Acely's website work, so you can apply its structural logic while replacing its aesthetic identity with NutriPath's.

2.1 Acely's Architecture

Acely (acely.com) is a personalized SAT/ACT test prep platform for US high schoolers. Its website is built on Next.js with a multi-page architecture:

Navigation: Fixed top bar, white background on scroll. Left: wordmark logo. Center: 5 nav items (How it works, Exams [dropdown], Resources, Pricing, Reviews). Right: Login (outlined button) + primary CTA (filled dark blue pill button, "Start your free trial"). An urgency-driven announcement bar sits above the nav in a bold accent color (hot pink/magenta).

Homepage section order (the conversion logic):

1. Announcement bar (urgency/seasonal hook)
2. Sticky navigation
3. Hero — bold headline + subtext + single CTA + product UI composite image
4. Social proof logos bar (institution logos auto-scroll)
5. How it works — 4-step numbered process (tell goal → plan builds → focus areas → improve)
6. Feature deep dive — tabbed or accordion left column, product dashboard screenshot right
7. Social proof pull-quote (Trustpilot badge + stat + 3 testimonial cards with before/after score pills)
8. FAQ accordion
9. Bottom CTA section (illustration + headline + CTA button)
10. Mega footer (4-column link grid + social icons)

Individual product pages (SAT Prep):

1. Full-bleed colored hero (dark teal/blue) with large centered headline + subheadline + 2 trust micro-icons + CTA + product dashboard screenshot bleeding below fold
2. Feature icon grid (4-up: custom plan / score predictions / AI tutor / progress tracking)
3. Feature spotlight — alternating image-left / text-right (or vice versa) for each major feature, each with its own internal CTA
4. Social proof dark band (isolated testimonial on deep teal background)
5. Resource hub — 3-column card grid (SEO content cards with category label + headline + description + arrow CTA)
6. Competitive comparison table (NutriPath vs competitors, checkmarks/Xs)
7. More testimonials (3-column cards, score pill badges, large pull-quote typography)
8. Pricing cards (3 plans, toggle if needed, "Most Popular" highlight)
9. FAQ accordion
10. Footer

2.2 Acely's Design Language

Color palette:

- Deep navy (■ #0A1628) — primary text and backgrounds
- Vivid blue (■ #2563EB) — CTAs, links, accents
- Hot pink/magenta (■ #FF3FBE) — accent for energy, announcement bars, score badges
- Mint/sage (■ #34D399) — success states, checkmarks
- Warm off-white (□ #F9F7F4) — section backgrounds (alternates with white)
- Pure white (□ #FFFFFF) — cards, clean panels

Typography:

- Display/hero: A custom or distinctive serif-adjacent rounded display font — large, bold, expressive (reminiscent of Fraunces, Playfair, or a rounded display). Used only for H1s and section headlines. Creates warmth at large sizes.
- Body/nav/UI: A clean humanist sans-serif (similar to Inter or DM Sans). Very readable at small sizes.
- All headlines in dark navy for authority; colored headlines (teal or bright blue) on specific sub-pages for scan hierarchy.
- Heavy use of sentence case. Almost no ALL CAPS except micro-labels.

Grid system:

- Max container: ~1200px, centered with generous padding
- Card grids: 3-column for testimonials and resources, 4-column for feature icons
- Feature spotlights: strict 50/50 split columns (text left, visual right OR visual left, text right, alternating)
- Generous vertical white space between sections (80–120px section gaps on desktop)
- Slight background color variation between sections (white → off-white → white) to create visual rhythm without borders

Button system:

- Primary: Filled dark navy or blue pill shape, rounded ~50px border-radius, white text, arrow → on end
- Secondary: Outlined pill, same border-radius, dark text
- Hover state: subtle background darkening + slight lift (box-shadow increase)
- No square buttons anywhere on the site

Card design:

- Testimonial cards: Off-white background (□ #F4F2EF), generous padding (28–32px), border-radius 16px, score badge pill at top left in mint green with dark text (before→after format), large body text quote, avatar circle + name + role at bottom

- Resource cards: Off-white, 16px radius, subtle top gradient wash in brand accent color, category eyebrow label, H3 headline, body text, pill CTA at bottom
- Feature cards: White background, colored icon box (4 distinct brand colors), H3, body text — simple, clean

Score/result pills: Distinctive UI element. Small rounded pills (like badges) showing "SAT 1360 → 1520" or "+110 POINTS". These are the visual proof tokens. They appear on hero sections, testimonial cards, and social proof bands. They feel like stamps of transformation.

Dashboard mockup visual style: High-fidelity app UI screenshots, often floating on a colored card background (purple, teal, dark navy) with slight shadow and rounded corners. They serve as concrete evidence the product is real and sophisticated.

Illustration style: Line-art illustrations of figures/people in motion — playful, slightly whimsical, black line on colored (light purple, mint) backgrounds. Used sparingly for decorative sections (CTA bottom sections, empty state elements).

Animation principles:

- Subtle fade-up on scroll for section content (opacity 0 → 1, translateY 20px → 0)
- No jarring animations; everything is measured and soft
- Auto-scrolling logo marquee (infinite loop, pauses on hover)
- Hover: scale(1.02) on cards with a box-shadow increase
- Announcement bar: can pulse or shimmer to draw attention
- Tab/accordion transitions: smooth height expand (300ms ease)
- No parallax, no heavy JS animations — performance-first

Micro-interactions:

- Checkmark icons animate in on scroll (draw-in effect)
- Score counter increments on scroll for stats
- FAQ rows expand with smooth height transition, chevron rotates

Mobile responsiveness:

- Nav collapses to hamburger menu at 768px
- 3-column grids → 1-column stacked
- Feature spotlights → stacked (image above, text below)
- Hero text shrinks proportionally; CTAs remain full-width buttons
- Sticky bottom CTA bar on mobile product pages

2.3 Acely's Conversion Logic (Why Each Section Exists)

Section	Business Purpose
Announcement bar	Creates time-based urgency; current campaign hook
Fixed nav	Persistent access to sign-up at any scroll depth
Hero	Crystallizes value prop; primary CTA moment #1
Logo bar (institutions)	Social proof by association; immediate credibility signal
How it works (4 steps)	Eliminates confusion about what happens next; reduces drop-off
Feature deep-dive (tabbed)	For high-intent visitors who need more detail before converting
Testimonials + score pills	Proof of outcome; emotional resonance via relatable stories
FAQ	Objection handling; converts fence-sitters
Bottom CTA	Final conversion moment for bottom-of-page visitors
Comparison table	Competitive positioning; answers "why not the free alternative?"
Resource hub (SEO cards)	Organic traffic capture; top-of-funnel nurture for non-ready visitors
Footer	Trust, navigation, accessibility compliance signal

PART 3 — NUTRIPATH BRAND IDENTITY

3.1 Color Palette (strict adherence required)

Name	Hex	Usage
Primary Green	#3A760D	Primary buttons, active states, H2 on white sections, key accent
Bright Green	#54B51B	Hover states, score badges, success indicators, score improvement pills
Charcoal	#343433	Body text, nav text, dark backgrounds
Mid Grey	#767676	Subtext, metadata, secondary labels
Off-white	#F5F7F2	Section alternating backgrounds (green-tinted off-white)
Pure White	FFFFFF	Card backgrounds, primary page background

Name	Hex	Usage
Deep Forest	 #1A3D06	Dark sections (hero variants, CTA bands, footer) — derive from Primary Green
Light Sage	 #E8F4E0	Testimonial card backgrounds, feature card fills

Do not introduce purple, pink, teal, or any color outside this defined palette. The green-charcoal-white system is the entire identity.

3.2 Typography System

Display / Heading Font: Nunito

- Source: Google Fonts (free)
- Weights: 700 (bold) and 800 (extra-bold)
- Usage: All H1, H2, H3 headings and hero text
- Character: Rounded terminals, warm, non-clinical, approachable authority
- Letter-spacing: Slightly tight (-0.02em) for large headings
- Line-height: 1.1-1.2 for large display sizes

Body / UI Font: Lexend

- Source: Google Fonts (free)
- Weights: 400 (regular), 500 (medium), 600 (semibold)
- Usage: Body copy, navigation, buttons, labels, captions, form inputs, meta text
- Character: Designed to reduce visual stress; optimized for dyslexic and neurodiverse readers; open letterforms with generous spacing
- Line-height: 1.6-1.7 for body text (increased from standard for accessibility)
- Letter-spacing: Default (Lexend is pre-optimized)

Type Scale:

- H1 (hero): 56-72px / Nunito 800
- H2 (section): 36-48px / Nunito 700
- H3 (card/feature): 22-28px / Nunito 700
- Body large: 18-20px / Lexend 400
- Body: 16px / Lexend 400
- Small/label: 13-14px / Lexend 500 or 600
- Button: 16px / Lexend 600

3.3 Voice & Tone

NutriPath speaks like a brilliant dietitian friend who has been exactly where you are and wants you to succeed — without any pressure, hierarchy, or sales tactics.

Tone dimensions (calibrated):

- Formal ↔ Casual: 55 (slightly casual, professional but conversational)
- Serious ↔ Playful: 31 (mostly serious, but warm and human — not clinical)
- Reserved ↔ Bold: 50 (confident but never aggressive)

Approved phrases and voice markers:

- "You've got this"
- "Built by dietitians, for dietitians"
- "RD-created"
- "Accessibility-first"
- "Study smarter, not harder"
- "At your own pace"
- "Pass with confidence"
- "We've been there"
- "Designed for how you actually learn"
- "Founding member"
- "Community"
- "Neurodiversity-friendly"

Strictly forbidden language:

- "Crush it" / "Crush the exam" — too aggressive for anxious learners
- "Easy" — condescending and inaccurate
- "Guaranteed pass" or any pass-rate promise
- "Best-in-class" / "industry-leading"
- "Unlock the power of..."
- "All-in-one solution"
- Any pushy, aggressive, or "Gucci sales language"
- Jargon without definition (always define CDRE, KCAT, IED, ICDEP in first use)

3.4 Brand Personality

Warm-human. Accessibility-first. Lived-experience authority. Community over competition. Calm confidence over hype.

The brand archetype is The Mentor — not The Expert lecturing from above, but The Peer who went first and is now holding the door open.

PART 4 — SITE ARCHITECTURE

Build the following pages. Deliver them in this priority order:

Page Priority Order

Priority 1 (Urgent — must launch by July 2026):

- KCAT Landing Page (</kcat>) or (</kcat-prep>)

Priority 2 (Core launch — before November 2026 CDRE pilot):

- Homepage (</>)
- CDRE Platform Page (</cdre-prep>) or (</cdre-platform>)
- About / Founder Story Page (</about>)
- Pricing Page (</pricing>)

Priority 3 (Launch or shortly after):

- Accessibility Statement Page (</accessibility>)
- Blog/Resources Hub (</resources>) — SEO content cards
- Contact / Partnership Inquiries page (</contact>)

Navigation Structure

Top bar (fixed, sticky on scroll):

- Logo: NutriPath wordmark + icon mark
- Left nav links: How It Works | Programs ▼ (dropdown: CDRE Prep, KCAT Prep) | Resources | Pricing | About
- Right: Login (outlined button, links to CDRE Platform) | Join the Waitlist (filled green pill button)

Announcement bar (above nav, on all pages):

- Background: Primary Green (#3A760D), white text
- Content: "🌿 KCAT Summer 2026 Bootcamp is open — [Join the waitlist →]" (update to reflect current campaign)
- This bar should be dismissible (X button) with localStorage state

Footer (4-column mega footer, dark background (#1A3D06)):

- Column 1: Logo + mission one-liner + social links (LinkedIn)
- Column 2: Programs (CDRE Prep, KCAT Prep, About the Exams)
- Column 3: Resources (Blog, CDRE Study Guide, KCAT Study Guide, Accessibility)

- Column 4: Connect (Contact, Partnership Inquiries, Email: nutripathcanada@gmail.com, LinkedIn)
 - Bottom bar: © 2026 NutriPath Canada | Accessibility Statement | Privacy Policy | Built by Maxxlab
 - Tagline in footer: "CDRE & KCAT built by dietitians"
-

PART 5 — PAGE-BY-PAGE CONTENT & DESIGN SPECIFICATIONS

5.1 HOMEPAGE (1)

Section 1: Announcement Bar (*keep, adapted*) Height: ~44px. Background #3A760D. White Lexend 14px text. Current campaign message with underlined hyperlink CTA.

Section 2: Navigation (*keep, adapted*) White background, #343433 links, Lexend 500 16px. On scroll, adds box-shadow: 0 2px 12px rgba(0,0,0,0.08). Primary button: #3A760D filled pill. Login: outlined in #3A760D.

Section 3: Hero (*adapted from Acely's "How It Works" hero*)

Layout: Split 50/50 on desktop. Left: text. Right: composite visual.

Left column content:

[Eyebrow: Small green pill tag reading "Built by dietitians, for dietitians"]

H1 (Nunito 800, 64px, Charcoal):

"Your path to passing
starts here."

Body (Lexend 18px, Mid Grey):

"CDRE and KCAT prep designed for how
Canadian dietitians actually learn –
accessible, RD-created, and built by
someone who's been exactly where you are."

[Primary CTA button, #3A760D]: "Join the Founding Cohort →"

[Secondary link, underlined]: "Explore the KCAT Bootcamp"

[Trust micro-row beneath buttons, Lexend 13px, Mid Grey]:

✓ Accessibility-first design ✓ RD-created content ✓ Study at your own
pace

Right column: A composite "proof visual" (see Section 7 — Asset Creation for detailed AI image prompt). This should show:

- A mock NutriPath platform dashboard card (dark green header, showing a study plan)

- Overlaid floating badge: "CDRE Attempt 1 → Pass ✓" in the Bright Green pill style
- A second overlaid card showing "Study streak: 14 days" with a small progress bar
- The arrangement should feel like floating UI elements, not a flat screenshot

Hero background: White. No full-bleed dark hero on homepage (save that for product pages).

Section 4: Partner/Trust Logo Bar (*adapted — replace institution logos with Canadian health/RD orgs*)

Auto-scrolling marquee of logos relevant to NutriPath's world. If real logos are unavailable, use placeholder text-based wordmarks styled consistently:

- Dietitians of Canada (DC)
- CDRE (exam authority reference only, not endorsement)
- HealthNet (client has this SVG logo)
- University/agency partners (placeholder until real partnerships confirmed)
- UN SDGs badge strip (SDG 3, 4, 8, 10)

Section label above marquee (centered, Lexend 13px, Mid Grey uppercase tracking):

ALIGNED WITH LEADING ORGANIZATIONS IN DIETETICS & PUBLIC HEALTH

Marquee speed: gentle, 40s loop. Logos: grayscale at 60% opacity, full color on hover.

Section 5: The Problem / Stakes (*new section, no Acely equivalent — critical for NutriPath*)

This section exists because NutriPath's audience needs to feel seen before they trust the solution. Acely skips problem-framing because SAT prep stakes are obvious. CDRE/KCAT stakes are not widely understood.

Layout: Centered, max-width 780px, generous vertical padding.

Content:

H2 (Nunito 700, 42px, Charcoal, centered):
"The CDRE is one of the hardest career moments a dietitian faces."

Body (Lexend 18px, centered, line-height 1.7):
"Only offered twice a year. Three lifetime attempts. Existing prep resources that weren't built by RDs, weren't designed for accessibility, and cost over \$1,200 without guaranteeing you'd feel prepared."

[3-stat row, styled as large data display:]
Column 1: "775" large Nunito 800 green / "CDRE/KCAT candidates/year"
Column 2: "3" large Nunito 800 green / "lifetime attempts per candidate"
Column 3: "2x/year" large Nunito 800 green / "exam offered"

[Below stats, italic Lexend 16px, Charcoal]:
"The stakes are real. Your prep should match them."

Background: □ #F5F7F2 (off-white sage tint). Full-width section.

Section 6: How It Works — 4 Steps *(keep structure, replace content)*

Label: HOW IT WORKS (Lexend 600, 12px, green, uppercase, letter-spacing 0.12em) H2:
"Study smarter. Pass with confidence."

Four-step cards in a horizontal row on desktop, stacked vertically on mobile:

Step	Title	Body
01	Tell us where you are.	Share your exam date, background (Canadian grad or IED), and where you feel least confident.
02	Get your personalized path.	Your study plan is built around your timeline and learning style — not a one-size template.
03	Study in the format that works for you.	Text, video, audio, flashcards, mock exams — built for neurodiverse and all types of learners.
04	Walk into the exam with confidence.	Not a guaranteed pass. A genuine preparation experience, built by people who've been there.

Step number chips: Small square with rounded corners, ■ #3A760D background, white Lexend 700 number.

Section 7: Feature Deep-Dive — Left Tab / Right Platform Visual *(keep Acely's pattern, replace content)*

Left column: Clickable tabs (or accordion on mobile), each revealing its text content:

1. **Study with a plan built for you.** — "Your plan updates as you practice, adapting to where you're strong and where you need more support."
2. **Multi-format content for every learner.** — "Text notes, video walkthroughs, audio summaries, flashcards, mock exams, and an AI tutor. Because not everyone learns the same way — and that's the point."
3. **Find what's holding you back.** — "Detailed performance reports show you exactly which competency areas need work, so you're never studying in the dark."
4. **Full CDRE mock exams.** — "Practice under real conditions with full-length CDRE-format mock exams, timed and scored like the actual test."

Right column: A high-fidelity NutriPath platform dashboard mockup (see Asset Section 7.B for creation brief). This should be a framed browser/app window on a Light Sage (#E8F4E0) card background with slight drop shadow. The mockup shows a "Your Study Plan" interface with study session cards, a progress tracker, and a competency map.

The right visual updates (with a smooth crossfade, 400ms) as the left tab is clicked.

Section 8: Social Proof — Testimonials *(keep Acely's pattern, NutriPath-specific content)*

Background: White Top: Text-based star rating display (5 stars in #54B51B) + custom trust statement H2: "Built by dietitians. For dietitians." Subtext: "Hear from candidates who've prepared with NutriPath."

Three testimonial cards (3-column desktop, 1-column mobile):

Card style: #E8F4E0 background, 16px border-radius, 32px padding.

Card 1:

- Badge pill: "KCAT — January 2026 Bootcamp" in #54B51B
- Quote (Nunito 700, 22px): "I only wish I had known about NutriPath before my first KCAT attempt!"
- Attribution: Jana J. | January 2026 KCAT Bootcamp Participant

Card 2 (center, slightly elevated — "featured" card):

- Badge pill: "CDRE Candidate" in #3A760D
- Quote (Nunito 700, 22px): "NutriPath actually understands the exam. The content is built by people who sat the CDRE. That makes all the difference."
- Attribution: Dietitian candidate testimonial (collect post-launch or use anonymous placeholder)

Card 3:

- Badge pill: "IED Pathway" in #767676

- Quote (Nunito 700, 22px): "As an internationally educated dietitian, I finally found prep resources that acknowledged my path — not just the domestic grad experience."
- Attribution: IED candidate (collect or placeholder)

Below cards: Centered text CTA — "Read more stories →" linking to a future /reviews page.

Important note: Do not fabricate pass rates or specific outcomes. Use real testimonials where available. For placeholder cards, write clearly from the perspective of the target audience without inventing claims.

Section 9: What Makes NutriPath Different — Comparison (keep Acely's comparison table, adapted)

H2 (centered): "Why NutriPath? See how we compare." Subtext: "Existing CDRE/KCAT resources are expensive, outdated, and weren't built by registered dietitians. NutriPath was."

Comparison table — 3 columns (Feature | NutriPath | Existing Alternatives):

Feature	NutriPath	Existing Alternatives
Created by Registered Dietitians	✓	✗ (usually generic test-prep companies)
WCAG 2.1 AA Accessibility	✓	✗
Multi-format content (video, audio, text, flashcards)	✓	Text-only or limited
Full CDRE/KCAT mock exams	✓	Limited or unofficial
AI study tutor	✓	✗
Personalized study plans	✓	✗
Neurodiverse-friendly design	✓	✗
Payment flexibility (payment plans)	✓	Rarely
IED pathway support	✓	✗
Price	Transparent + flexible	\$900–\$1,500+ with less content

NutriPath column: (◻ #E8F4E0) background, bold green checkmarks. CTA below table: "Join the Founding Cohort →" (primary button, centered)

Section 10: The Founder Story Strip (new section — replaces Acely's illustration band)

This section is unique to NutriPath and builds the emotional credibility that no other section can replicate.

Layout: 2-column, 50/50. Left: founder photo (warm, professional, approachable — from provided team photos). Right: story text.

Left: Berin's photo in a rounded square frame (24px border-radius), overlaid with a small card in bottom-left corner: "Took the CDRE twice. Built this so you don't have to go through it alone." in Lexend 14px on white card.

Right text:

[Eyebrow tag, green]: "Why NutriPath exists"

H3 (Nunito 700, 28px):

"I sat the CDRE twice. I spent over \$1,200 on prep materials not built by RDs."

Body (Lexend 16px, 1.7 line-height):

"I'm also neurodiverse – and the existing resources weren't built with people like me in mind. After passing, I knew there had to be a better way. So I built it."

NutriPath is the platform I wish had existed when I was studying. Created by registered dietitians. Designed for accessibility from day one. Built on the belief that your career shouldn't be decided by how well the prep resources worked for someone else's brain."

[Attribution line]: Berin Arikan, MPH, RD – Founder, NutriPath Canada

[Secondary CTA, underlined link]: "Read the full story →"

Section background: White. This section sits after the comparison table, before Pricing.

Section 11: Pricing Preview (*adapted*)

H2 (centered): "Simple, transparent pricing." Subtext: "No hidden fees. Payment plans available. Because cost shouldn't be a barrier."

Show 2–3 pricing tiers (based on NutriPath's actual product lineup). If full pricing TBD at build time, show a simplified "Join the Waitlist" with promise of founding member pricing:

[Founding Member Card – special treatment, border: 2px solid #3A760D]:

 Founding Cohort – November 2026 CDRE Pilot

"Be among the first 25 members. Founding pricing.

Direct input into the platform. Your name in the story."

[Button]: "Secure your founding spot →"

[KCAT Bootcamp Card]:

KCAT Summer 2026 Bootcamp

"Focused KCAT prep. Live sessions, community, mock KCAT."

[Button]: "Join the KCAT waitlist →"

[General Waitlist Card – lighter style]:

Stay in the loop

"Get updates, early access, and launch-week founding member pricing delivered to your inbox."

[Button]: "Join the email list →"

If full pricing is confirmed, show 3-column pricing cards with plan names, monthly price, feature list, and a "Most Popular" badge on the recommended tier.

Below pricing: Lexend 14px Mid Grey text — "Payment plans available. Preparation support — never a pass guarantee."

Section 12: FAQ Accordion *(keep pattern)*

H2: "Frequently asked questions."

Include the following questions (write full answers in NutriPath brand voice):

1. What is the CDRE? Who needs to take it?
2. What is the KCAT? How is it different from the CDRE?
3. Is NutriPath created by actual registered dietitians?
4. Is the content WCAG-accessible and neurodiverse-friendly?
5. How is NutriPath different from other CDRE prep resources?
6. How many times can you attempt the CDRE?
7. When is the next CDRE exam? When is the next KCAT?
8. Can internationally educated dietitians (IEDs) use NutriPath?
9. What formats does the content come in?
10. Is there a payment plan available?

Accordion rows: 1px border-bottom ( #E5E7E0), chevron rotates on open, smooth height transition 280ms ease-out.

Section 13: Bottom CTA Band *(keep Acely's pattern)*

Background: ( #1A3D06) (deep forest green). Full-width. Layout: Centered, max 640px.

H2 (Nunito 700, white, 42px, centered):

"Your next exam date is closer
than you think."

Body (Lexend 16px, sage-tinted white, centered):

"Start preparing with resources built by dietitians,
designed for how you actually learn."

[Primary button, white background, green text]:

"Join the founding cohort →"

[Small text below]: "25 spots. November 2026. No pressure – just
preparation."

Optional: Berin's signature or a small abstract NutriPath mark as decorative element at
bottom of this band.

5.2 KCAT LANDING PAGE (`/kcat` or `/kcat-prep`) — URGENT

This is the most time-sensitive deliverable. Build first.

Hero (Full-bleed, dark green  #1A3D06 background):

[Breadcrumb: Home / KCAT Prep – white, Lexend 13px]

H1 (Nunito 800, white, 56px, centered):

"KCAT prep built by dietitians.
Designed for how you actually learn."

Subheadline (Lexend 18px, sage tint, centered):

"The Knowledge and Competency Assessment Tool is a high-stakes
licensing step for internationally educated dietitians. NutriPath
prepares you the right way – accessibly, honestly, and completely."

[CTA button, white background, green text, centered]:

"Join the KCAT Summer 2026 Waitlist →"

[Trust strip beneath button, centered, Lexend 13px, sage tint]:

✓ RD-created content ✓ Built for IEDs ✓ Accessibility-first

[Hero visual]: Platform dashboard mockup floating below hero
on a white-to-dark-green gradient, bleeding into the next section

Section: What Is the KCAT? (education section — no Acely equivalent needed)

Explain in plain language:

- The KCAT is a written examination required as part of the IED (internationally educated dietitian) registration process in several provinces
- It tests knowledge and competency across Canadian dietetic practice
- It is offered [X times per year] and requires serious preparation
- NutriPath's KCAT content is built by registered dietitians who understand the IED journey

Diagram visual (asset to create): A simple clean illustration of the KCAT registration journey: Arrive in Canada → Document Assessment → KCAT → Supervised Practice → Registration as RD. Each step as a node in a path, with "KCAT" node highlighted in #3A760D.

Section: What's in the KCAT Bootcamp?

4-feature icon grid (same pattern as homepage How It Works):

1. **Live Study Sessions** — Weekly group study calls led by RD instructors
2. **KCAT-Specific Content** — Study notes, question bank, and flashcards mapped to KCAT competencies
3. **Mock KCAT Assessments** — Full-length practice assessments with detailed feedback
4. **Community Support** — Private community of KCAT candidates supporting each other

Section: Bootcamp Outcomes

Honest, transparent presentation of bootcamp results:

"Our January 2026 KCAT Bootcamp pilot included 3 candidates:
→ 1 passed the KCAT
→ 1 narrowly missed — she's returning with NutriPath's support
→ 1 has paused — and we're here whenever she's ready

We don't claim guaranteed results. We claim genuine preparation."

Style: Pull-quote format, centered, Nunito italic, #3A760D color. This radical transparency is a brand differentiator and should be displayed proudly.

Section: Testimonial

Featured single testimonial (full-width dark band):

- Background: #343433 (charcoal)
- Quote (Nunito 700, white, 28px, centered, max 720px): "I only wish I had known about NutriPath before my first KCAT attempt!"

- Attribution: Jana J. — January 2026 KCAT Bootcamp Participant
- Badge pill above quote: "KCAT Bootcamp, January 2026" in  #54B51B

Section: KCAT Waitlist CTA

Large centered email capture form (styled inline — no modal):

H2: "Summer 2026 KCAT Bootcamp"

Body: "Limited spots. Join the waitlist to be first."

[Email input field + green "Join waitlist" button inline]

[Form connects to Kit (ConvertKit) — tag: KCAT-2026-Summer]

Below form: Privacy-respecting note — "We'll never spam. One email to confirm your spot. Unsubscribe anytime."

5.3 CDRE PLATFORM PAGE (</cdre-prep>)

Same structural logic as Acely's SAT prep page. Full-bleed dark green hero → feature deep-dives → testimonials → comparison → pricing → FAQ.

Hero headline: "CDRE prep that meets you where you are." Hero subhead: "Built by RDs. Designed for accessibility. Structured for your exam date."

Feature spotlights (alternating image/text, 2-column, same as Acely):

1. Personalized CDRE study plan that adapts as you practice
2. Multi-format content: video, audio, text, flashcards, AI tutor
3. Full CDRE mock exams with performance analytics
4. Community: study alongside other CDRE candidates

Include the "Founding Cohort" CTA prominently — this is the November 2026 pilot.

5.4 ABOUT / FOUNDER STORY PAGE (</about>)

Hero: Simple, centered, white background. H1: "Built from lived experience." Subtext: Short version of the mission statement.

Founder Section: Full bio + larger photo. Use the founder headshot (Nutripath.jpg from provided assets). Photo on left, text right. Story matches brand copy from discovery form exactly.

Team Section: 3–4 RD bios. Use provided team photos (NutriPath-47.jpg through NutriPath-16.jpg). Layout: Cards with circular or rounded-square portrait, name, title, 2-sentence bio. Use:

- Berin Arikan, RD, MPH — CEO & Founder

- Sylvia Sun — RD Content Developer
- Kristine Brigino — RD Content Developer
- Mirey — Brand Ambassador

Mission & Impact Stats Section:

- 26 RDs per 100,000 Canadians
- 70% of Ontarians without dietitian access in primary care
- 775 CDRE/KCAT candidates per year
- Aligned with UN SDGs 3, 4, 8, 10

Values Section: 4-column icon cards:

1. Accessibility First
2. RD-Created Content
3. Honest Communication
4. Community Over Competition

5.5 ACCESSIBILITY STATEMENT PAGE ((/accessibility))

This page signals institutional credibility and differentiates NutriPath from every other prep product. Treat it as a brand page, not a legal afterthought.

Header: Green hero band, white headline: "Accessibility isn't a checkbox. It's our foundation."

Content sections:

- NutriPath's commitment to WCAG 2.1 AA and AODA compliance
 - Specific features designed for neurodiverse learners: Lexend font, high contrast options, audio content, closed captions, flexible pacing
 - AccessibilityWidget/toolbar mention (UserWay or EqualWeb floating toolbar)
 - How to request accommodations or report an accessibility issue
 - Contact: nutripathcanada@gmail.com
-

PART 6 — UX & INTERACTION REQUIREMENTS

6.1 Navigation Behavior

- Nav is sticky (position: fixed) with white background at all times
- At page top, nav has no border; on scroll past 60px, a subtle shadow appears ((box-shadow: 0 2px 16px rgba(52,52,51,0.08)))

- Active nav item: underline in `#3A760D`, 2px, animated in on hover
- Dropdown (Programs): Appears on hover (desktop) or tap (mobile). White card panel, 16px border-radius, drop shadow. Links: CDRE Prep, KCAT Prep. Closes on outside click or focus loss.
- Mobile hamburger: slides in from right, full-height overlay, `#1A3D06` background, white links, animated at 300ms ease

6.2 Scroll Animations

All section content fades in and rises on scroll entry:

- `opacity: 0 → 1`, `transform: translateY(24px) → translateY(0)`
- Duration: 500ms, easing: `cubic-bezier(0.16, 1, 0.3, 1)` (fast-out spring)
- Trigger: IntersectionObserver at 15% element visibility
- Stagger children inside a section: 80ms delay between items
- Respect `prefers-reduced-motion`: if set, skip transforms, only do instant opacity

6.3 Announcement Bar

- Dismissible with X button (right-aligned)
- Dismissed state stored in `sessionStorage` (so it re-appears each session)
- Background `#3A760D`, white text, optional left emoji icon (🌱)
- Links: underlined in white, hover: opacity 0.8

6.4 Email Capture Forms

- Inline form (not modal) on KCAT page and Homepage
- Fields: Email input only for waitlist (reduces friction)
- Submit button: same width as input, primary green
- Success state: Replace form with: "You're on the list! 🌱 Check your inbox to confirm." (green text, Lexend 16px, no page reload)
- Error state: Red border on input, Lexend 14px error message below
- Connect to Kit (ConvertKit) via their embed code or API, with appropriate tag per form location
- GDPR/CASL-compliant: Checkbox for email consent OR link to privacy policy visible near submit button

6.5 Accessibility Toolbar

Implement the UserWay or EqualWeb floating accessibility widget on all pages. This allows visitors to adjust:

- Font size
- Contrast mode

- Dark mode
- Colour blind modes
- Reading guides

The toolbar should appear as a small floating button in the bottom-right or bottom-left corner, using a neutral grey color that doesn't clash with brand CTAs.

6.6 Score/Result Pills (NutriPath adaptation)

Instead of Acely's "SAT 1360→1520" pills, create NutriPath's equivalent:

- "KCAT: Pass ✓" in #54B51B pill
- "Founding Cohort: Nov 2026" in #3A760D pill
- "CDRE Attempt 2: Passed" in bright green pill with subtle checkmark icon

These appear on: Hero section overlaid on dashboard mockup, Testimonial cards, social proof bands.

6.7 Performance Requirements

- Core Web Vitals: LCP < 2.5s, CLS < 0.1, FID < 100ms
- All images: WebP format, lazy-loaded, with explicit width/height to prevent layout shift
- Google Fonts loaded with font-display: swap and preconnect
- No render-blocking JS in <head>
- Logo marquee uses CSS animation (no JS) for smooth infinite scroll
- Reduced-motion media query respected throughout

6.8 SEO Requirements

Every page must include:

- <title> tag with primary keyword first
- Meta description (150–160 characters, action-oriented)
- OG tags (og:title, og:description, og:image — use brand imagery)
- <h1> containing primary keyword
- Alt text on every image (descriptive, not generic)
- Structured data: Organization schema on homepage, FAQPage schema on FAQ sections

Target keywords per page:

- Homepage: "CDRE exam prep Canada", "dietitian licensing exam preparation"
- KCAT page: "KCAT study guide Canada", "KCAT exam prep internationally educated dietitians"

- CDRE page: "CDRE prep platform", "CDRE practice exam Canada"

6.9 Platform Integration CTAs

All CTAs linking to the CDRE LMS platform (built separately by Rayyan Adeel / Maxxlab) must:

- Link to a designated URL (to be confirmed — placeholder: `(https://app.nutripath.ca)`)
 - Open in the same tab (not new tab) for seamless flow
 - On mobile, include touch targets of minimum 44×44px
 - Use `(rel="noopener")` if linking to external platform
-

PART 7 — ASSET CREATION REQUIREMENTS

For every visual asset, the following describes what is needed, its purpose, and a detailed AI image generation prompt. All assets should be generated in a consistent visual style: clean, warm, professional, soft photography or illustration style. No stock-photo aesthetics.

7.1 Hero Composite Visual (Homepage)

Purpose: Show the NutriPath platform experience without building the full platform. Creates believability and aspiration.

Style: Floating UI cards on a white or very light sage background, similar to how Acely uses floating dashboard snippets with overlaid badges. NOT a full browser window. Instead: 2–3 overlapping card snippets suggesting an app, with score/result badges floating near them.

AI Image Generation Prompt:

Clean flat-design product UI mockup for a Canadian dietitian exam prep app called NutriPath.

Design a composite of 3 floating card elements on a white background with very slight drop shadows:

Card 1 (largest, dark green #1A3D06 header): "Your CDRE Study Plan" – shows a weekly study schedule grid

with green progress dots and session names like "MNT Module 1", "Community Nutrition", "Food Safety Review".

Card 2 (top-right, smaller): Green oval badge showing "CDRE: First Attempt → Pass ✓" in white text on #3A760D.

Card 3 (bottom-left, medium): A competency map snippet showing a mini horizontal progress bar chart

with labels like "Medical Nutrition Therapy: 72%", "Food Service: 58%", "Community Nutrition: 84%"

in Lexend-style sans-serif font. All cards have 16px border radius.

Overall composition: cards arranged in a slightly diagonal cluster, 2-3% overlap, light green shadow (#3A760D at 10% opacity), no realistic photos.

Color palette: white, #3A760D, #54B51B, #343433, #E8F4E0.

Style: clean SaaS product marketing, minimal, professional, editorial quality.

7.2 Platform Dashboard Mockup (Feature Deep-Dive Section)

Purpose: Show the actual platform interface in enough detail to convey sophistication and functionality.

AI Image Prompt:

High-fidelity desktop app UI mockup for NutriPath – a Canadian RD licensing exam prep platform.

Show a browser window (Chrome-style header, white) containing:

Left sidebar (dark #1A3D06): Logo at top, nav items including "Study Plan", "Question Bank", "Practice Tests", "Performance", "Community", "Resources" – each with a simple icon.

Active item "Study Plan" highlighted in #3A760D.

Main content area (white): Header "Your Study Plan – CDRE November 2026", below that a weekly calendar view (Mon-Sun) with session blocks color-coded in greens

(completed = #54B51B, upcoming = #3A760D outline, locked = #E8F4E0).

Right panel (light sage #E8F4E0): Shows "Current Score Estimate: 72%" with a circular progress ring,

and "Days to Exam: 47" in large Nunito bold numbers.

Below the score panel: a recent activity feed ("Completed: MNT Case Study – 15min ago").

Overall style: clean, minimal, professional SaaS UI. Lexend-style sans-serif throughout.

Palette: #1A3D06, #3A760D, #54B51B, #E8F4E0, #343433, #767676, white.

Resolution: 1440x900 equivalent composition. Editorial quality, no skeuomorphism.

7.3 KCAT Journey Diagram

Purpose: Help IED candidates understand the registration pathway and where the KCAT fits.

AI Image Prompt:

Clean, minimal infographic illustrating the IED (internationally educated dietitian) pathway to registration in Canada. Linear horizontal flow diagram with 5 circular nodes connected by a dotted path line:

Node 1: "Credential Assessment" – document icon, grey fill

Node 2: "Language Requirements" – speech bubble icon, grey fill

Node 3: "KCAT Examination" – highlighted in #3A760D with white text, star/exam icon – this is the focus

Node 4: "Supervised Practice" – person-at-desk icon, grey fill

Node 5: "RD Registration" – checkmark badge icon, #54B51B fill

Above Node 3: Small floating label "NutriPath helps here →" in a green rounded badge.

Style: flat icon illustration, Lexend-compatible sans-serif labels below each node.

Background: white. Palette: #3A760D, #54B51B, #767676, #343433.

Suitable for web display at 900px wide × 200px tall. Clean, professional, accessibility-conscious.

7.4 Founder Photo Treatment

Asset type: Photography directive (not AI-generated; use provided photo ([Nutripath.jpg](#)))

Treatment instructions:

- Crop to square or 4:5 portrait ratio
- Apply very subtle warm colour grade (lift shadows slightly, add micro-warmth to skin tones)
- Overlaid floating card (white background, 16px border-radius, subtle shadow):
 | "I built the resource I wish had existed." — Berin Arian, MPH, RD
- Card position: bottom-left corner of the photo, 50% overlapping the image

7.5 Team Photo Grid

Asset type: Photography directive (use provided NutriPath-XX.jpg files)

Treatment instructions:

- Consistent crop: 1:1 (square) for all team portraits
- Consistent colour treatment: clean, slightly warm, professional
- Display in circular or rounded-square (24px radius) frames
- No dark overlays or filters — keep natural, warm, approachable
- If full-body photos, crop to head-and-shoulders

7.6 Abstract Brand Illustration (Bottom CTA section)

Purpose: Decorative warmth element for the bottom CTA band — replaces Acely's line art

illustration.

AI Image Prompt:

Minimal line art illustration of a woman studying confidently – warm, diverse representation

(Southeast Asian or Middle Eastern heritage, professional clothing).

She is seated at a desk with a laptop, looking calm and focused, slight smile.

Style: thin continuous line drawing, monochrome with a single green (#54B51B) highlight accent on

her laptop screen or a plant detail nearby. NO colour fill except the single accent.

Background: transparent (PNG).

The illustration should feel warm and human, not clinical or corporate.

Similar aesthetic to Headspace or Notion's brand illustrations.

Width: 400px. Height: 500px. Format: PNG with transparent background.

7.7 Social Proof Score Pill Graphics

Purpose: UI elements used in hero and testimonial areas.

Create as SVG or CSS components (not images):

- Pill shape, border-radius 100px
- Background:  #54B51B
- Text: White, Lexend 600, 14px
- Content format: "[Exam] [Status]" e.g. "KCAT: Pass ✓", "CDRE Attempt 2: Pass ✓", "Founding Member: Nov 2026"
- Optional icon: small checkmark ✓ or leaf 🌿 on left

PART 8 — TECHNICAL REQUIREMENTS

8.1 Recommended Stack

Based on client requirements (Webflow preferred per discovery form — "designer-friendly, visual editor, mid-cost hosting"):

Recommended: Webflow

- Visual editor for Berin to make content edits post-launch without developer
- Webflow native hosting with global CDN
- CMS for blog content cards (Resources hub)
- Native form handling or Webflow + Kit (ConvertKit) integration

Alternative (if Webflow scope is insufficient): Next.js on Vercel

- Better for complex content models
- Integrates more cleanly with external platforms
- Requires developer for future edits (appropriate if Maxxlab maintains ongoing)

Decision note: Since Rayyan Adeel (Maxxlab) is building both the website and the CDRE LMS platform, and the platform likely uses a modern JS stack, Next.js + Vercel is the more architecturally coherent choice. Webflow is appropriate if post-launch editing independence for Berin is the priority. Confirm with client.

8.2 Integrations

Integration	Purpose	Tool
Email marketing	Waitlist/newsletter capture	Kit (ConvertKit)
Payments	Enrollment and plan payments	Helcim (primary) + Stripe (backup)
Analytics	Traffic and conversion tracking	GA4
Booking	Partnership/consult calls	Calendly
Accessibility widget	Floating accessibility toolbar	UserWay or EqualWeb
LMS link	Platform sign-in/sign-up	Custom URL to CDRE Platform (confirm with Rayyan)

GA4 setup requirements:

- Configure conversion events: `waitlist_signup`, `founding_cohort_click`, `platform_signup_click`
- Enable Enhanced Measurement
- Set up Google Search Console connection
- Create Goals for each primary CTA type

8.3 Domain & Hosting

- Domain: `nutripath.ca` (purchased via Namecheap, 3-year registration)
- If Webflow: point domain to Webflow hosting from Namecheap DNS
- If Next.js/Vercel: point domain A records to Vercel edge network
- SSL: auto-provisioned by either platform (Let's Encrypt)

- www redirect: `www.nutripath.ca` → `nutripath.ca` (canonical)

8.4 Accessibility Compliance

All pages must meet:

- **WCAG 2.1 Level AA** (Web Content Accessibility Guidelines)
- **AODA** (Accessibility for Ontarians with Disabilities Act) compliance

Technical requirements:

- All images have descriptive `alt` text
- Keyboard navigation works on all interactive elements (Tab, Enter, Escape, Arrow keys)
- Focus indicators visible (never remove `outline` without replacing it)
- Color contrast: body text minimum 4.5:1 ratio against background
- Color contrast: large text (18px+) minimum 3:1 ratio
- Form inputs have associated `<label>` elements (not placeholder-only)
- Skip-to-main-content link at top of page
- Semantic HTML: proper heading hierarchy (h1 → h2 → h3, never skipped)
- ARIA labels on icon-only buttons and interactive elements
- Video content (when added): captions required
- UserWay/EqualWeb widget as supplementary layer (not a replacement for built-in accessibility)

8.5 Mobile Responsiveness

All layouts must be fully responsive at these breakpoints:

- Desktop: 1280px+ (primary design target)
- Laptop: 1024px-1279px (minor adjustments)
- Tablet: 768px-1023px (2-column grids, condensed nav)
- Mobile: 375px-767px (single column, hamburger nav, stacked sections)
- Small mobile: 320px-374px (ensure no horizontal overflow)

Mobile-specific UX:

- Sticky bottom CTA bar on product pages (e.g., "Join the KCAT Waitlist") appearing after user scrolls past hero
 - Tap targets minimum 44×44px for all buttons and links
 - Form inputs at 16px font size minimum (prevents iOS auto-zoom)
 - Images use `srcset` for resolution-appropriate delivery
-

PART 9 — CONTENT GUIDELINES & WRITING INSTRUCTIONS

9.1 Defining Terms on First Use

Every page must define CDRE and KCAT on first use. Use a consistent formula:

"The CDRE (Canadian Dietetic Registration Examination) — Canada's national licensing exam for dietitians, offered twice a year with a three-attempt lifetime cap."

"The KCAT (Knowledge and Competency Assessment Tool) — a written exam required for internationally educated dietitians (IEDs) as part of the Canadian registration pathway."

After first definition, use the acronym freely.

9.2 Claim Discipline

Never write:

- "Guaranteed to pass"
- "Our students pass at X% rate" (unless verified data available)
- "Best" or "only"

Always write:

- "Preparation support — not a pass guarantee"
- "Built by registered dietitians"
- "Designed to give every candidate the best possible preparation"

Berin's personal CDRE experience (passed on second attempt after neurodiverse challenges) is powerful and should be used. Never imply she passed first try. The second-attempt success story is a feature, not a flaw.

9.3 IED Sensitivity

Internationally educated dietitians face additional barriers: language, document assessment, unfamiliarity with Canadian context. NutriPath content must:

- Never assume Canadian-born background
- Acknowledge the IED pathway explicitly and by name
- Frame the KCAT as a step in a legitimate professional journey, not a gatekeeping mechanism
- Avoid language that implies IEDs are less qualified (they are not)

9.4 Neurodiversity Framing

NutriPath's founder is neurodiverse. The platform is designed for neurodiverse learners. This is a differentiator, not a footnote.

Usage guidelines:

- Use "neurodiversity-friendly" and "neurodiverse learners" (not "learning disabled")
 - Mention multi-format content as a feature specifically because it accommodates different learning styles
 - Do not imply neurodiversity requires "help" — it requires a different design approach, which NutriPath provides
-

PART 10 — CONVERSION OPTIMIZATION INSTRUCTIONS

10.1 CTA Strategy

Every page has exactly one primary CTA hierarchy:

Homepage:

- Primary: "Join the Founding Cohort" → CDRE Platform sign-up
- Secondary: "Join the KCAT Waitlist" → Kit email form

KCAT Page:

- Primary: "Join the KCAT Summer 2026 Waitlist" → inline email form

CDRE Page:

- Primary: "Secure your founding spot" → Platform sign-up or email form

About Page:

- Primary: "Start your CDRE prep" → CDRE Platform or waitlist

10.2 Urgency Mechanics (NutriPath-appropriate)

Acely uses time-pressure aggressively ("Join Camp Acely 🚧 "). NutriPath's audience is anxious; push-based urgency will backfire. Use *honest* scarcity instead:

- "25 founding member spots for the November 2026 CDRE cohort"
- "The CDRE is offered only twice a year — the next window is [date]"
- "KCAT Summer 2026 Bootcamp has limited spots"

These are true, not manufactured. Frame them as helpful information, not sales tactics.

10.3 Trust Velocity

Place trust signals early and often:

- Announcement bar: Sets campaign context immediately

- Hero eyebrow: "Built by dietitians, for dietitians" — first line of copy above the fold
- Hero trust strip: ✓ Accessibility-first ✓ RD-created ✓ At your own pace
- First testimonial or social proof within 2 scroll lengths of any page hero

10.4 "Which Path Is Right for Me?" Flow (Recommended Feature)

Per the brand kit, Berin wants to implement a guided "which learning sounds like you?" quiz/flow to direct visitors to the right product (CDRE vs KCAT vs specific package tier). This is mentioned as a key insight from student team presentations.

Implement as: An interactive 3-question quiz embedded in the homepage or as a modal triggered by a secondary CTA. Questions:

1. "Are you preparing for the CDRE or KCAT?" (radio: CDRE / KCAT / Not sure)
2. "When is your exam?" (radio: Within 3 months / 3-6 months / 6+ months / Not yet scheduled)
3. "Which describes you?" (radio: Canadian dietetic grad / Internationally educated dietitian (IED) / Repeat test-taker)

Based on answers, show a recommended product card with the appropriate CTA. This reduces decision paralysis and serves as a micro-conversion moment.

PART 11 — LAUNCH CHECKLIST (For Completeness)

The building agent should verify all of the following before declaring a page launch-ready:

- ☐ All pages load in under 3 seconds on a 4G mobile connection
- ☐ All images have descriptive alt text
- ☐ Keyboard navigation works on all interactive elements
- ☐ Skip-to-content link present
- ☐ GA4 installed and conversion events firing
- ☐ Kit (ConvertKit) form integration tested end-to-end (submission → email confirmation)
- ☐ All CTAs lead to correct destinations
- ☐ 404 page styled with NutriPath brand and navigation back to homepage
- ☐ nutripath.ca resolves correctly with HTTPS
- ☐ www redirect to non-www (or vice versa — pick canonical and stick to it)
- ☐ Sitemap.xml generated and submitted to Google Search Console
- ☐ robots.txt configured (allow all except /admin or backend routes)
- ☐ UserWay/EqualWeb widget installed and visible on all pages
- ☐ Privacy Policy page exists (even if minimal) — required for CASL compliance
- ☐ Accessibility Statement page live
- ☐ Social sharing preview (OG tags) verified via Facebook Debugger or similar
- ☐ LinkedIn social link in footer verified

- ☐ Mobile tested on iOS Safari and Android Chrome
 - ☐ All fonts loading correctly (Nunito + Lexend from Google Fonts with preconnect)
-

PART 12 — WHAT NOT TO BUILD

The following are out of scope for this website build:

- The CDRE LMS platform itself (built separately by Rayyan Adeel)
 - A user account system or login flow on the marketing site (login links to the external platform)
 - A full blog CMS with content (set up the structure, leave content population for post-launch)
 - E-commerce/full checkout (payments are handled by Helcim/Stripe on the platform side; the website only links to it)
 - Multi-language support (English only for launch)
 - Dark mode (the brand's light green/white scheme is the primary; accessibility toolbar handles contrast preferences)
-

FINAL NOTE TO THE BUILDING AGENT

NutriPath is not just a product. It is a founder's lived experience built into a platform. Every word, every pixel, every interaction should feel like it was crafted by someone who sat the CDRE twice, spent \$1,200 on inadequate resources, and decided that future candidates deserved better.

The Acely framework gives you the conversion architecture. The NutriPath brand gives you the soul.

Build it with both.

The opposite of Acely's high-energy SAT urgency is not passivity — it is calm confidence. NutriPath should feel like the wisest, most prepared friend you could have walking into the exam. Never frantic. Never pushy. Always present, always capable, always built by dietitians who care.

When in doubt: ask what Berin would say to a candidate who just failed their first CDRE attempt and is scared to try again. That's the voice. That's the site.
